Portfolio: https://lordlowdar.github.io/reactportfol/

Full Stack Web Developer with a focus on Front End. With a strong base and knowledge gained from the UC Davis bootcamp I hope to hit the ground running. I have always been a dedicated worker no matter the task and I want to show that to you as well. While my experience formally may be limited, I'm ready to begin my quest in the tech field.

Technical Skills:
  Front End: HTML5, CSS3, Bootstrap, JavaScript, jQuery, React, GraphQL
  Back End: Node.js, Express, mySQL/Sequelize, MongoDB/Mongoose. REST API

Projects:
Know More Tiers || https://github.com/LordLowdar/know-more-tiers ||
https://know-more-tiers27.herokuapp.com/

- Know more Tiers is an application meant to bring people together by sharing a tier list that has common rankings. Rank certain activities or interests in a drag and drop screen and be matched with others having similar lists.
- This was a group effort. I was in charge of wireframing and initial concepts. After I focused on modal login and template styling for app using SASS and then auth using JSON Web Tokens. Miro board was instrumental for wireframing.

Ubiquitous Happiness || https://github.com/LordLowdar/ubiquitous-happiness ||
https://ubiquitouscommunity.herokuapp.com/

- Ubiquitous Happiness is a place where up and coming streamers can get noticed. In a world where streaming has become a huge source of entertainment, we want you to find the next big thing before they are. Top games being streamed will load on your dashboard and you can see who's the most popular at the time.
- This group project resulted in me being the lead on auth and login. I designed the login modal and its functionality.

Work Experience:
Community Health Solutions - Consultant, Floor Manager, Assistant General Manager
            1918 16th Street, Sacramento, CA 95811 11/1/19 - Present

          Typical Duties: Oversees 20 employees, hand selecting them and training them resulting in limited to no employee turnover. Kept detailed logs of all money in building and tracked them using excel and other POS programs. Maintained vendor relations over 3 years with over 30 brands, cultivating more deals to increase our profit margins month over month. Communicated with third party facilitators to increase online presence and increase online sales by 25%.

Education: UC Davis Continuing and Professional Education, Davis, California   Certificate in Full Stack Web Development – December 2021
